

## HFN COVID-19 Response

There is no greater time when values are tested than during uncertainty or crisis, Hanger Fabrication Network is committed to provide fabrication services for Hanger patients and clinicians.

While our business navigates the short-term impact Covid-19, a focus on minimizing financial impact on our company is paramount.

We are asking clinicians to leverage our network and maximize savings through **sending custom O&P orders to HFN** and minimize external spend.

### Updates and resources:

- Our front line teams are on high alert – let us know how we can help
- We have split/extended shifts to meet demand and enact social distancing
- Resources: [Hanger Fabrication Network Resources](#)
- Remote 'fast track' digitization training sessions are available on request.

Our team has never been more proud to work together, to share trust and to demonstrate our commitment to One Hanger Values.
